- Collaborations for Community involvement and Service

# VISIONARY GOALS

To build a foundation for school improvement by establishing trusting relationships with staff members, as well as, acquainting myself with the unique strengths of our school as soon as possible.

**GOAL 1**

Begin the process of building trusting relationships with the members of our school community, students, and parents.

**GOAL 2**

Establish high expectations that are clearly defined and communicated as modeled by the director. All stakeholders must hold themselves accountable for making our school the very best school.

**GOAL 3**

# CLIMATE AND CULTURE

School culture and climate are important to the overall success of the school. My culture of the campus is defined as...

students, parents, and staff working together to create a family environment of learners.

## Objectives:

1. Establish ongoing, clear, and consistent communication with all staff, students, parents and community members.
2. Promote our school, our teachers and our students by sharing our successes.
3. Build a strong and united campus team, in which, we focus our efforts on creating a culture of academic excellence.

# GOOD TO GREAT
