<a href="#">Innovation in Teaching Competition: Beyond the Textbook</a> By Georgia Department of Education	●	●	●	●	●	●	●	●	●				<p>The Innovation in Teaching Competition: Beyond the Textbook began as part of Georgia’s Race to the Top plan to create and support highly-effective teachers. The competition has two main goals. First, to recognize and reward educators from across our state who are using innovative strategies to advance student achievement. And second, to make videos of the winning teachers, along with their unit plans and supplementary materials, available to all Georgia educators.</p> <p>On this site, you will find videos, unit plans, and supplementary materials from these winning teachers. These resources represent a variety of grade levels and innovative strategies, from project-based and applied learning to differentiated small group instruction and creative classroom management techniques. All of the resources you will find here are real unit plans created by real teachers, and are designed to help your students learn in new ways – off the grid, past the classroom walls, and beyond the textbook.</p>
<a href="#">Inside Mathematics</a> By The University of Texas at Austin Charles A. Dana Center		●	●	●		●							Short 2-minute Vignettes of teaching mathematics.
